Dave Becher 684 Timber Ridge Dr. St. Charles, MO 63303

Dear Mr. Becher:

I am writing to you regarding your request for Missouri Department of Conservation (MDC) cost share assistance. I am authorized to allocate a maximum of \$3,300 (flat rate) MDC cost share for the 30 ac of heavy TSI that we have planned on your farm. MDC cost share pays \$110/ac for this practice. In order for you to receive this payment your project needs to be completed and approved by myself, as outlined in your management plan, no later than June 1, 2013. In addition, I will need copies of all invoices you acquire (seed, material etc.) that are related to this project.

MDC conducts business on a fiscal year basis beginning July 1 and ending June 30 each year. Therefore, I am required to wrap up year end business no later than June 1 each year. Mr. Becher, if you foresee any reason this project cannot be completed by June 1, 2013, please give me a call so we can discuss our options, possibly deobligating your MDC cost share dollars. Deobligating cost share dollars is not something I encourage, however, it is not possible to carry over MDC cost share dollars allocated this fiscal year to next fiscal year.

appreciate the interest you have in managing natural resources on your land and look forward to seeing your project when it is completed. If you have questions related to your MDC cost share or need further field assistance, feel free to contact me at the Montgomery County USDA Field Service Office in Montgomery City at (573) 564-3715, Ext. 110.

Sincerely,

Jamie Barton

Dave Becher TSI Work FY13

Dave Becher TSI Recommendations

Narrative – This plan describes the procedures and requirements for the forest thinning work you plan to do on your property using the MDC Cost Share Program. The objective of the restoration practice is to provide habitat that is more favorable to whitetail deer, eastern wild turkey and other associated species.

In general your property is dominated by white oak, chinkapin oak, post oak, eastern red cedar, hickory and red oak. Sugar maple is fairly dense in the understory. Removing the sugar maple and thinning the oak/hickory mix will open the canopy and allow more sunlight to reach the forest floor. Timber Stand Improvement (TSI) will allow more desirable trees to grow at a faster rate, stimulate oak regeneration and improve wildlife habitat by creating a more diverse ecosystem. Periodic prescribed fire after the TSI treatment will help maintain the stand.

Plan

Heavy [TSI – Requires the removal of > 40 basal area/acre. All locust, elm, eastern red cedar, disfigured or poor quality oaks, and undesirable tress should be removed from the restoration area. Approximately 75% of the hickory trees should be removed. Any sugar maple found in the treatment area should be cut and sprayed with herbicide to prevent it from sprouting back. I included treatment options with this plan.

Dave Becher 684 Timber Ridge Dr. St. Charles, MO 63303

Dear Mr. Becher:

I am writing to you regarding your request for River Hills cost share assistance. I am authorized to allocate a maximum of \$2,682.00 for 8.7 ac of extra heavy thinning and 14.1 ac of heavy thinning work that we have planned on your farm. River Hills cost share reimburses landowners 90% of the cost of having this practice implemented, up to a maximum rate of \$130/ac for extra heavy thinning and \$110/ac for heavy thinning work. In order for you to receive this payment your project needs to be completed and approved, as outlined in your management plan, no later than June 1st, 2015. In addition, I will need copies of all invoices you acquire (seed, material etc.) that are related to this project.

MDC conducts business on a fiscal year basis beginning July 1st and ending June 30th each year. Therefore, I am required to wrap up year-end business no later than June 1st each year. Mr. Becher, if you foresee any reason this project cannot be completed by June 1st, 2015, please give me a call so we can discuss our options, possibly deobligating your River Hills cost share funds. Deobligating cost share funds is not something I encourage, because it is not possible to carry over cost share funds allocated from one fiscal year to the next.

I appreciate the interest you have in managing natural resources on your land and look forward to seeing your project when it is completed. If you have questions related to your River Hills cost share allocation or need further field assistance, feel free to contact me at the Montgomery County USDA Field Service Office in Montgomery City at (573) 564-3715, Ext. 110.

Sincerely,

Jamie Barton

Dave Beecher Habitat Work - FY15

Dave Becher Habitat Recommendations FY15

Narrative

The primary objective of this project is restore the historic vegetative species composition and structure of the woodlands on your property. The management practices used to achieve this objective are heavy woodland thinning and extra heavy woodland thinning. These management practices will require the cutting of undesirable and shade tolerant species such as eastern red cedar and sugar maple. Once these and other undesirable species are deadened, sunlight reaching the ground will make for more favorable conditions for native fruit and seed bearing species to grow.

Plan

Heavy Woodland Thinning – Requires the removal of > 40 ft² BA/ac. All locust, elm, eastern red cedar, disfigured or poor quality oaks, and undesirable tress should be removed from the restoration area. Approximately 50% of the hickory trees should be removed. Any sugar maple, grape vines, autumn olive or other invasive trees/shrubs should be cut and treated with herbicide to prevent them from sprouting back. Treatment options are enclosed in this plan.

Extra Heavy Woodland Thinning – Requires the removal of > 70 ft² BA/ac. This site is heavily infested with eastern red cedar. All locust, elm, cedar and other undesirable trees should be deadened. Any sugar maple, grape vines, autumn olive or other invasive trees/shrubs should be cut and treated with herbicide to prevent them from sprouting back. When finished, chinkapin and post oaks should be main species left standing.

Practice Maintenance

If done properly, there should be little to no follow up maintenance needed. You are expected to maintain this practice for a period of 10 years. This simply means that you cannot do anything that would "destroy" the practice for that period or else you will be out of compliance with the program. If the enrolled acres are taken out of compliance (such as for development purposes or livestock grazing), we would simply ask that you pay back the cost share money that you received for the project.

This work must be completed and approved by June 1st, 2014.

Dave Becher 684 Timber Ridge Dr. St. Charles, MO 63303

Dear Mr. Becher:

I am writing to you regarding your request for MDC cost share assistance. I am authorized to allocate a maximum of \$2,397.50 for 13.7 ac of heavy woodland thinning work that we have planned on your farm. In order for you to receive this payment your project needs to be completed and approved, as outlined in your management plan, no later than June 1st, 2016. In addition, I will need copies of all invoices you acquire (seed, material etc.) that are related to this project.

MDC conducts business on a fiscal year basis beginning July 1st and ending June 30th each year. Therefore, I am required to wrap up year-end business no later than June 1st each year. Mr. Becher, if you foresee any reason this project cannot be completed by June 1st, 2016, please give me a call so we can discuss our options, possibly deobligating your cost share allocation. Deobligating cost share funds is not something I encourage, because it is not possible to carry over cost share funds allocated from one fiscal year to the next.

I appreciate the interest you have in managing natural resources on your land and look forward to seeing your project when it is completed. If you have questions related to your cost share allocation or need further field assistance, feel free to contact me at the Montgomery County USDA Field Service Office in Montgomery City at (573) 564-3715, Ext. 110.

Sincerely,

Jamie Barton
