

Every buyer of any interest in residential real property is notified that the property may present exposure to dangerous levels of indoor radon gas that may place the occupants at risk of developing radon-induced lung cancer. Radon, a Class-A human carcinogen, is the leading cause of lung cancer in non-smokers and the second leading cause overall. The seller of any interest in residential real property is required to provide the buyer with any information on radon test results of the dwelling showing elevated levels of radon in the seller's possession.

The Illinois Emergency Management Agency (IEMA) strongly recommends ALL homebuyers have an indoor radon test performed prior to purchase or taking occupancy, and mitigated if elevated levels are found. Elevated radon concentrations can easily be reduced by a qualified, licensed radon mitigator.

☐ ☐ (a) Elevated radon concentrations (above EPA or IEMA recommended Radon Action Level) are known to be present within the dwelling. (Explain)

☐ ☐ (b) Seller has provided the purchaser with all available records and reports pertaining to elevated radon concentrations within the dwelling.

☐ ☒ (c) Seller either has no knowledge of elevated radon concentrations in the dwelling or prior elevated radon concentrations have been mitigated or remediated.

☐ ☒ (d) Seller has no records or reports pertaining to elevated radon concentrations within the dwelling.

	(e) Purchaser has received copies of all information listed above.
	(f) Purchaser has received the IEMA approved Radon Disclosure Pamphlet.

☒ (g) Agent has informed the seller of the seller's obligations under illinois law.

The following parties have reviewed the information above and each party certifies, to the best of his or her knowledge, that the information he or she has provided is true and accurate.
